

Bob/Richard

I just wanted to take a minute to say thank you to you and the team at Marina Technologies. I had no idea when we first spoke that our working relationship would accelerate as quickly as it did. The destruction caused by Hurricane Sally was not expected and we needed options quickly. You and your entire team went to work immediately to build and deliver a working ferry landing ahead of schedule. You certainly went above and beyond normal expectations in this type of scenario. As a design consultant there is no way to return the favor other than putting into words my sincere appreciation of the professional work that your company produced, thank you!

Sincerely,

Jason J. Frick, PE
