To Whom It May Concern,

It is with great pleasure that I attest to the professional relationship we have had with Marina Technologies.

This was our first experience of incorporating a marina into the luxury apartment community that we are working to complete in Green Island, NY. I have appreciated the vast knowledge and expertise that Bob Berry has been able to provide throughout the design. Our project was completed on time and has exceeded our overall expectations.

I am happy to recommend Marina Technologies as a manufacturer of high-quality dock materials.

Thank you,

Chuck Pafundi Jr
